DETAILED ACTION

Response to Arguments

1. Applicant's arguments with respect to claims 1 and 12 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1 and 12 are rejected under 35 U.S.C. 102(e) as being anticipated by Barnard et al (U.S. PG PUB No. 2005/0097016).

4. As per claims 1 and 12, Barnard et al teach a method for providing procurement services to a plurality of customer companies with complex accounting rule while providing secure information viewing in support of the customer companies being organized in a plurality of customer company groups and procurement coalitions for volume discount and access to shared contracts with respect to a plurality of vendors with procurement contracts leveraged across company groups comprising providing said procurement resources in a front-end catalog and requisition server receiving a user request from a first client browser to log in to said front-end

server; responsive to said request, providing a user interface at said client browser only to procurement resources authorized by said user profile and said resource profiles receiving requests from a plurality of users authorized by different company groups to enter a requisition to a vendor with respect to the same catalog or contract resource; and generating separate purchase orders to said vendor with respect to requisitions originating with users from each said company group ... (*see Barnard's entire disclosure*).

5. Please note: Examiner did not feel compel to rewrite/repeat the entire claims in the rejection since it would redundant and time consuming to do so. It is respectfully request from the applicant, in preparing the responses to fully consider the references in its entirety as potentially teaching all or part of the claimed invention as well as the context of the passage as taught by the prior art or disclosed by the examiner.
